PCM CARRIER

Aqua Cutter 410

Carrier for the power control module

The PCM Carrier is an easy-to-use trolley, designed to fit and carry the Aqua Cutter 410 robot's Power Control Module (PCM).

The PCM Carrier is a perfect complement to the 410 robots when the need to disconnect the PCM from the tracked crawler arises, making it possible to drive the crawler into tight and inhospitable environments.

It is also a complement to the Aqua Cutter PCM, allowing easy handling of the PCM when it's used to power any of our fixed hydrodemolition equipment.

Facts

PCM position	Backward/Forward
Brakes	Front wheels
Steering	Front wheels
Weight	70 kg (154 lb)
